School attended: High School Lichtenburg

Highest grade passed: Grade 12 Year of completion: 2022

Subjects:

- Mathematics
- Engineering Graphics and Designs
- Physical Science
- Accounting
- English
- Afrikaans
- Alpha Mathematics

Relevant experience

Company: NWK Lichtenburg Head Office

Period: April 2025 – Present

Occupation: System Tester in the Finance Department

Responsibilities:

- Design, document, and execute test plans, test cases, and test scenarios for business-critical systems.
- Perform manual End-to-End testing, functional, regression, integration, and user acceptance testing to validate system functionality and business requirements.
- Identify and document defects throughout the software development lifecycle.
- Validate system behavior against functional specifications, business requirements, and expected workflows.
- Collaborate with developers, users, and stakeholders to investigate issues
- Contribute to software quality assurance processes by ensuring systems meet performance, usability, and reliability standards.
- Design, develop, execute, and maintain automated end-to-end test scripts, perform retesting and regression testing of resolved defects, and generate test reports, maintain reliable automation suites, and ensure software quality and stability to support successful application releases using tools such as excel, playwright and windsurf.
- Support continuous improvement of testing methodologies, automation frameworks, and QA processes to improve testing efficiency and software quality.
- Analyze system functionality and business processes before and during testing to identify gaps, inefficiencies, and potential risks, producing recommendation reports to support continuous system improvement.

Company: NWK Lichtenburg Head Office

Period: April 2026 – Present

Occupation: Part time AI-Engineer and developer

More Info:

Pursued additional responsibilities in AI engineering and software development to gain hands-on experience in full-stack development, AI applications, backend systems, and software architecture alongside my QA Tester role.

Responsibilities:

- Develop and maintain web application frontend features using Nuxt.js and Vue.js.
- Develop and maintain backend services, business logic, and APIs using Laravel PHP.
- Assist in the design and development of AI-powered applications and intelligent automation solutions using Python and Large Language Models (LLMs).
- Integrate frontend applications with APIs, backend services, and AI-driven functionality to deliver efficient business solutions.
- Collaborating on system architecture, feature development, and application optimization.
- Perform API testing and validation using Postman.
- Basic SQL for database validations.

Company: NWK Lichtenburg Head Office

Period: March 2024 – April 2025

Occupation: Learner System analyst in the Finance Department

Responsibilities:

- Develop and maintain business process models, workflow diagrams, and system documentation using ARIS.
- Analyze and document existing business processes and system workflows.
- Collaborate with business users, stakeholders, and developers to gather and define system requirements.
- Map and document existing systems, business processes, functional specifications, and data flows.

Company: Head Office NWK Lichtenburg

Period: November 2023 – December 2023

Occupation: Shadow in the IT Department

Responsibilities:

- Assisting in the development of smaller programs
- Any ad hoc tasks

Short Courses

- Ethical Hacking and Cybersecurity Course for Beginners
- Udemy Learn Web Development in PHP MYSQL with a Project
- Udemy Software Manual Testing – Complete Course: Beginner to Expert - Udemy
- The Complete Full-Stack Web Development Bootcamp – Udemy

Skills

Technical Skills

Programming Languages and Development

- PHP
- Java
- JavaScript
- TypeScript
- SQL
- Python
- HTML/CSS

Frameworks and Tools

- Laravel
- Nuxt.js
- Vue.js
- MySQL
- MariaDB
- Postman

Automation

- Large Language Models
- Workflow Automation
- Prompt Engineering

Collaboration Tools

- Git

- Jira
- Bitbucket

Quality Assurance and Testing

- Manual Testing
- Test Case Design
- Defect Reporting

System Analysis

- ARIS
- Requirements Gathering
- Process Mapping

Personal Attributes

- Strong attention to detail.
- Honest and reliable.
- Quick learner.
- Strong work ethic.
- Good communication skills.
- Teamwork
- Motivated to continuously improve
